Energy boost without caffeine

Great Taste
Strawberry Watermelon

Beet Root Extract
Stamina Component

Aqua-D Sport, is a **unique** and complete sports drink containing four components **needed** by athletes and those who participate in endurance sports or **intense cross-training!**

- ✓ Component One: Calcium and Vitamin D₃ for stronger bones;
- ✓ Component Two: An electrolyte blend containing Sodium (Na⁺), Potassium (K⁺), Magnesium (Mg⁺²), and Calcium (Ca⁺²) for more complete hydration;
- ✓ Component Three: B Vitamins and Ginseng Extract for energy;
- ✓ Component Four: Beet Root Extract for Stamina. There is no other sports drink on the market that is this complete.

A more comprehensive sports drink – Most of the sports drinks on the market focus on one function that an athlete requires – hydration. Aqua-D Sport is formulated to give the athlete many of the necessary functions. Aqua-D Sport contains beetroot extract, which has been shown in many studies to increase stamina. The results of a study published in the *Journal of Applied Physiology* showed that drinking beetroot juice prior to working out boosted stamina in male subjects and enabled them to exercise longer. The researchers demonstrated that drinking beetroot juice reduces oxygen uptake in exercising individuals to an extent that cannot be achieved by any other known means, including physical training. Bone health is also of concern in many athletes. According to a May 16, 2011 article in *Beverage Industry* magazine, "Bone health overall is a complex problem, and it requires a lot of different ingredients in order to support," Com Products' Kelly says. "You've got calcium and magnesium, which you use for bone health mineralization; Vitamin D, which aids the absorption of calcium; Vitamin C, copper and zinc, which can be used to build up collagen, but I think the important piece is that these ingredients all work in conjunction to support bone health." Aqua-D Sport is formulated with many of these ingredients.
